

PRESSURE REDUCING VALVES

CLA-VAL Automatic Control Valves

- o Pressure relief – solenoid control – seawater suction pressure relief
- o Altitude valves
- o Pump start control and suction control valves

CROKER CORPORATION (import and domestic)

- o Standpipe equipment included pressure restricting and reducing valves, siamese connections and roof manifolds; storz connections
- o Fire hose racks, extinguishers and cabinets

ELKHART BRASS MFG. CO. (domestic)

- o Specialty valves, monitors, handline and master stream nozzles, adapters
- o Hi-rise non-adjustable and field adjustable pressure regulating valves

SURGE AND PULSATION CONTROL PRODUCTS

YOUNG ENGINEERING MFG. INC.

- o **BSA** Surge Suppressors to control pressure surges and hydraulic transients which often occur with the start up or shut down of pumps
- o 2.5 gallon – 150 gallons with 275 and 500 psi pressure ratings.
- o Several units are UL and FM approve for use in fire protection systems
- o **BST** Bladder Surge Tanks absorb and control surge energies increasing the life of the components of a system.
- o Horizontal or Vertical; Stainless steel or epoxy coated carbon steel
- o Pre-charged bladder requires no on-site air compressor
- o 40 to 10,000 gallons standard size range with design pressures of 275 to 500 psi
- o Supports built to UBC seismic standards; tested in accordance with ASME and most are available with UL and FM approval
- o **BET** Bladder Expansion Tanks (contact your local customer service representative)
- o Protects antifreeze sprinkler systems from damaging effects of thermal expansion
- o Sized: 1 gallon to 150 gallons
- o UL Listed and FM Approved / 175 psi design pressure with a 4X safety factor
- o AA Stocking sizes: 1, 2.5, 5 and 10 gallons with mounting brackets
